1	There exists an economic dimension of the case study which was not explicitly stated in the descriptions	10/29/2025 1:52 AM
2	I didn't agree with everything, too much knowledge and opinion	10/28/2025 5:36 PM
3	Scope of industry stakeholder not entirely clear.	10/28/2025 5:30 PM
4	Maybe mention alternative treatment techniques which could be an additional option	10/28/2025 5:27 PM
5	elements on the context: number of cases, surface with OPM (now and forecast)	10/28/2025 5:27 PM

6	Resistance evolution, past experience with failed eradication attempts, pay experience or present with affected communities in areas of origin	10/28/2025 5:25 PM
7	There was a big assumption of a well informed public, which is good, but the group could also have some more emotion based representatives. They felt like researcher-light	10/28/2025 5:22 PM

1	Each of the selected issues had options representative of the various dimensions of the case-study. Yet some of these issues seemed independent from others. For example, deciding on whether to apply a uniform measure versus a per country measure (D) seems like a different question/ case study than "process criteria or hygiene criteria for campylobacter" (A).	10/29/2025 1:52 AM
2	the environment was initially not addressed as a separate issue	10/28/2025 5:33 PM

3	Promotion local studies vs using knowledge and experience of others	10/28/2025 5:27 PM
4	Prevention (issue added)	10/28/2025 5:27 PM
5	Uncertainties, limits of knowledge	10/28/2025 5:25 PM
6	proactive management	10/28/2025 5:21 PM

1	The only "missing aspects" were that some combinations of options were missing because we didn't have enough hours to run the simulation in its totality. Otherwise, the proposed deals absolutely fulfilled their purpose to make formal negotiations faster.	10/29/2025 1:52 AM

Q6 In your opinion, which aspects of the negotiation process (e.g. data sharing, moderation, stakeholder dialogue, AI support) most contributed to reaching the final deal?

Answered: 16 Skipped: 2

#	RESPONSES	DATE
1	Stakeholder dialogue, AI support (If there was any significant hindrance to the discussion, the moderator would also be a significant contributor)	10/29/2025 1:52 AM
2	Not sure about the data sharing, all was very useful	10/28/2025 5:36 PM
3	The whole structure as a whole was supportive. The need for AI im not convinced	10/28/2025 5:33 PM
4	Data sharing and stakeholder dialogue	10/28/2025 5:31 PM
5	AI support	10/28/2025 5:30 PM
6	AI Support in defining issues / options and find compromise	10/28/2025 5:29 PM

12	Stakeholder dialog after AI support	10/28/2025 5:23 PM
13	Data sharing and stakeholder dialogue	10/28/2025 5:22 PM
14	The stakeholder dialogue felt very fruitful	10/28/2025 5:22 PM
15	AI support, stakeholder dialogue	10/28/2025 5:21 PM
16	AI support	10/28/2025 5:21 PM

Q7 Do you have any other (general) comment to case study content, and/or organisation of the exercises you would like to share?

#	RESPONSES	DATE
1	There must be a better way to make use of the quantitative models for the negotiation (other than using them in a way akin to a paper from the literature just for the issue/option formulation step).	10/29/2025 1:52 AM
2	Not now, too tired. Explain the scoring at an earlier stage.	10/28/2025 5:36 PM
3	The final part where deals are discussed could be more structured, maybe supported by a table in the app	10/28/2025 5:33 PM
4	Great organization!	10/28/2025 5:28 PM
5	Weighting of actions within issues is not intuitive (would it preferable to have for an issue of 20, to split between the actions this score (e.g. 1, 10, 4, 5, 0)	10/28/2025 5:27 PM
6	Not at this point	10/28/2025 5:25 PM
7	More focus on negotiating the formulation of the options of each issue, rather than considering them as fixed blocks	10/28/2025 5:22 PM
8	It would have been nice if we were shown a step-by-step guide about what will happen during the negotiation	10/28/2025 5:21 PM
